Gabriel Acebal

Senior Software Engineer | 13+ Years | Full-Stack Developer | React · TypeScript · Angular · Node.js · C# · .NET · Java · AWS · Microservices | AI-Assisted Development
Greater Buenos Aires

Summary

Senior Software Engineer and Full-Stack Developer with 13+ years of experience building and maintaining web applications and backend services for banking, finance, telecom, and SaaS companies. Experienced in collaborating with US clients and distributed teams to translate business needs into technical solutions.Core technology stack:• Frontend: React, TypeScript, JavaScript, Angular, Next.js, Vue.js, Redux• Backend: C#, .NET / .NET Core, Node.js, Java• Cloud & DevOps: AWS, Docker• AI-Assisted Development: Claude, ChatGPTWhat I bring to a team:• End-to-end ownership, from understanding business requirements and designing solutions to implementation, testing, production support, and maintenance.• Experience troubleshooting complex issues and improving performance, maintainability, and software quality, including in demanding environments such as banking and financial systems.• Comfortable working in agile, remote environments across time zones, with strong English communication skills.• Knowledge sharing and active participation in technical discussions to help teams grow and deliver.AI in my workflow:I use Claude and ChatGPT daily to accelerate development, support code review, debug issues, write and refine unit tests, explore architectural approaches, and learn new technologies. I apply engineering judgment to review, adapt, and validate AI-generated output against project requirements and existing code before it reaches production.I'm open to Senior Software Engineer and Full-Stack Developer opportunities, including remote roles, where I can contribute my experience, solve meaningful problems, and keep growing alongside a collaborative team.

Experience

Aditi Consulting
Senior Full-Stack Software Engineer

September 2019 - Present (7 years 3 months)

Delivering enterprise software for US and Latin American clients across telecom, banking and financial services, SaaS, and fintech.

Key projects:

• Claro – Collections Platform

Developed the collections management system with secure authentication and CI/CD quality gates.

Stack: React, Redux, TypeScript, Material UI, Java, Oracle, REST APIs, JWT/OAuth2, OpenShift, Bitbucket CI/CD, SonarQube, JasperReports

• SAS Institute – Financial Crimes & Fraud Solutions

Developed features for Fraud Management, Anti-Money Laundering, Financial Crimes Monitor, Visual Investigator, Customer Intelligence, and Decision Services, enterprise platforms used by banks and financial institutions.

Stack: Angular, AngularJS, JavaScript, Java, Oracle, PostgreSQL, DB2, Snyk, Virtual RACE

• ConnectWise – Business Management Platform

Re-engineered the Change, Purchase, and Sales Orders modules, built the Microsoft 365 Calendar Sync integration, and contributed to the Manage platform.

Stack: .NET Core, React, JavaScript, Java, Go, Docker, SQL Server

• Hendrick Dynamics – Car Rental Platform

Developed features for a car rental application.

Stack: React, Node.js, C#, AWS, Docker, MongoDB, PostgreSQL

• SportBLX – Sports Investment Platform

Contributed to a sports investment platform, building contract workflows and secure authentication.

Stack: Vue.js, Node.js, TypeScript, AWS, OAuth2, Docker

Tools & practices:

• APIs & Architecture: REST, Microservices, MQTT, Swagger, JWT/OAuth2

• CI/CD & DevOps: Jenkins, Bitbucket CI/CD, Docker, OpenShift

• Testing: Jest, Mocha, Enzyme, JUnit, C# unit testing

• Code Quality & Security: SonarQube, Snyk, ESLint, Git (GitFlow, code reviews)

• Tooling: Webpack, npm/pnpm/Yarn, GitHub, GitLab, Gerrit, Jira

• Methodologies: Agile, Scrum, Kanban
• Design Handoff: Figma, Zeplin, Marvel
• AI-Assisted Development: Claude and ChatGPT for code generation and review, debugging, unit testing, documentation, and architectural exploration.

GYF Inteligencia Digital

Full-Stack Software Engineer

February 2017 - September 2019 (2 years 8 months)

Building web applications and services for banking and financial institutions.
• Developed frontend applications with React, Redux, and JavaScript, and backend services and APIs with C# and .NET Core.
• Built and integrated SOAP and REST web services, using Swagger to document REST APIs.
• Wrote unit tests for frontend and backend code to ensure reliability in financial systems.
• Worked in Scrum teams with CI/CD pipelines and code reviews.
Stack: React, Redux, JavaScript, jQuery, C#, .NET Core, SQL Server

Tools & practices:
• APIs & Integration: SOAP and REST web services, Swagger
• Testing: C# unit testing, Enzyme, Jest, Jasmine, Mocha, Chai
• Version Control: Git, GitHub, GitLab
• CI/CD: Jenkins
• Methodologies & Collaboration: Scrum, Jira

FUL-MAR S.A.

3 years 10 months

Team Leader

July 2016 - February 2017 (8 months)

Led the software development team, managing planning, delivery, and process quality.
• Planned project scope, timelines, and effort estimates using Scrum.
• Delegated and tracked tasks, coordinating communication across areas.
• Implemented a development methodology aligned with ISO 9001:2015 standards.
• Defined and maintained general project documentation.

Software Developer

May 2013 - January 2017 (3 years 9 months)

Designed and developed telecommunications software.

• Built applications with C#, VB.NET, ASP.NET, and PHP.
• Defined and documented requirements with stakeholders.
• Administered SQL Server databases and configured IIS and Windows Server environments.
• Performed application QA and testing.
Stack: C#, VB.NET, ASP.NET, PHP, SQL Server, IIS, Windows Server

G.S.A.
PC and Network Technician
January 2009 - April 2013 (4 years 4 months)

• Technical service for PC, all-in-one, notebooks and netbooks
• Design and assembly of networks.
• System maintenance
• Operating systems update

Education

Universidad de Palermo
Bachelor's degree, Information Technology · (2024 - 2027)

Instituto Nuestra Señora de la Paz
Associate's degree, Information Systems Analyst · (2010 - 2013)
