Gabriel Acebal

Sr Full-stack Developer
Greater Buenos Aires

Summary

I am a Senior Full-Stack Developer with 13+ years of experience in software development, currently working at a company.Throughout my career, I have participated in technology projects across different industries, working with modern frontend and backend technologies such as React, Redux, VueJS, Angular, Next.Js, JavaScript, Node.Js, TypeScript, Java, C#, .NET Core, Golang, AWS, Docker, and other tools and frameworks.I enjoy working in dynamic and collaborative environments where technology, teamwork, and continuous learning are key to delivering high-quality solutions. I am strongly focused on understanding business needs, solving complex technical challenges, and contributing with ownership, commitment, and a results-oriented mindset.I value communication, active listening, empathy, and knowledge sharing as essential pillars for building strong teams and successful projects.I am always open to new challenges that allow me to keep growing professionally while contributing my technical background, energy, and experience to achieve meaningful goals as part of a team.
